WELCOME TO WEERAN ANGUS

Dear Cattle Breeders,

We are feeling so fortunate with the season we are having in Western Victoria, yet to watch the news and read the paper, it is such tough seasonal conditions for so many right across the country. Our thoughts go out to our fellow farmers, and we hope you get some well earned rain and some relief very soon.

Welcome to the 2018 Spring Bull Sale catalogue. Coming off the back of a fantastic autumn sale, we are very excited to be offering you a line of excellent bulls with great structure, calving ease and exciting carcase attributes. We will be offering a small line of young 18 month old bulls, along with our larger offering of two year old bulls. Key sires are Millah Murrah Emperor K184, Weeran Joel, Wattletop Kiwi, Weeran Hooper, and Sydgen Black Pearl, with a couple of new sires for the young bulls being Tehama Upward Y238 and Ardcairnie F96.

The Angus Society have just released their latest results for the Angus Australia Benchmarking Trial, Cohort 6, and Weeran Joel just keeps kicking goals. Weeran Joel has come out in the top 10 in his Cohort for birthweight, 200 day, 400 day and 600 day weight, EMA and IMF. Currently, 367 progeny have been analysed

from 10 herds, and with a Heavy Grain Index of \$171 and an Angus Breeding Index of \$151, teamed with an EMA of 6.8, Joel is in the top 1% for three indexes and calving ease daughters and top 2% for scrotal. What a package! We call him the Joel Selwood of the Angus Breed!!!

Calving ease is something that we have really worked hard on, to deliver bulls who are calving ease and with power and carcase that add kilo's to the scales.

We are developing the herd further with 46 females purchased from the Coolana Dispersal Sale and two females from the Wattletop Dispersal Sale. These new genetics will add diversity to our breeding program here at Weeran. We are very excited at what they bring to our program.

We encourage everyone to come along to our field day on Wednesday 5th September, between 10am and 4pm to inspect the sale bulls. If you would like to inspect them any other time, please give us a call.

We look forward to welcoming you to Weerangourt.

Kind Regards

Alec and Jo Moore and the Weeran Team

DELIVERY

Weeran will organise delivery of your purchases free of charge up to 150kms. Over and above this by negotiation.

IBMS GTS GRADING

IBMS GENETIC TYPE SUMMARY (GTS)

All Weeran bulls have been assessed on the GTS Type/Structure system. All the bulls in the catalogue are considered acceptable for soundness and muscling. The GTS system has been broken up into two distinctive trait groups.

DESCRIPTIVE TRAITS

Stature - Evaluation of bulls for frame size. A maturity pattern 25 is an average frame bull. This may be influenced by age of dam, particularly first calf heifers.

Capacity - Bull evaluation combines depth of fore rib along with spring of rib and width of chest floor, as well as depth of flank. Scores greater than 25 indicate larger capacity.

Body Length - Evaluation of body length from withers to pins. Scores greater than 25 indicate longer body length. Muscle - Scores higher than 25 indicate above average muscle.

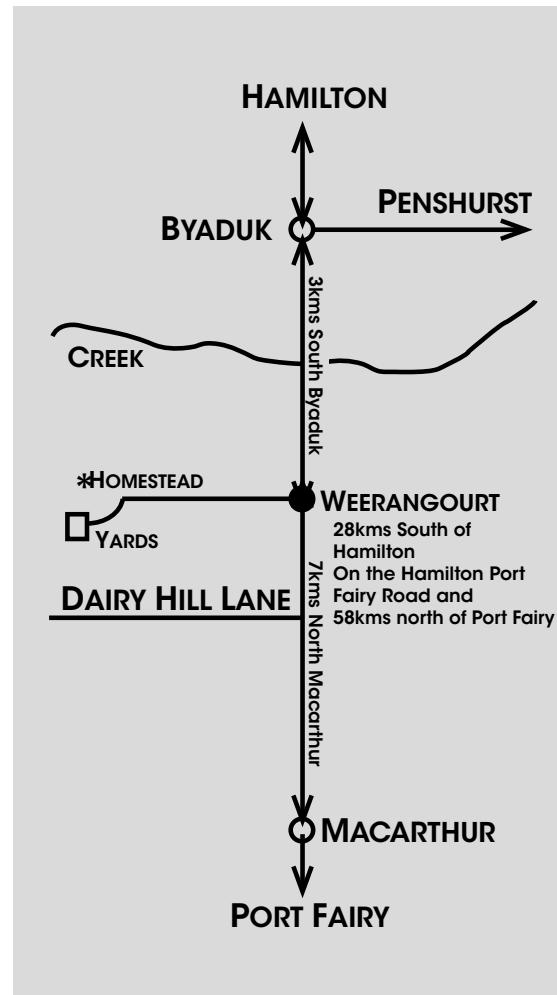

Doing Ability - Ability to lay fat relative to their peers under common management system.

STRUCTURAL SOUNDNESS TRAITS

The system is aimed at being as simple as possible. All structural traits (front and rear feet, rear leg angle and pastern scores) are presented in the same format. A score of 25 is the optimum. Scores of 23/24 and 26/27 represent a slight variation from ideal.

These animals would be acceptable in most breeding programs. Scores of 21/22 and 28/29 have a larger variation from ideal, but would be acceptable in most commercial herds, but seedstock producers should assess these animals carefully. Scores of 20 or 30 are low scoring and should be carefully evaluated prior to purchasing.

Bulls scoring outside these scores should be considered culled and not catalogued for sale. Structure scoring is only given to give potential purchasers a guide, it is not a guarantee of the lifetime structure soundness of an animal. Many thanks to Dick Whale for assessing all sale bulls. WEERAN GUARANTEES!

Weeran Joel is the full package for performance which has been validated with his outstanding results in the Angus Society benchmarking trial, Cohort 6. With a group of 41 sires registered, Joel is in the leading pack of all traits recorded. He has scanned 2nd for EMA and Rib Fat, and 4th for 200 day weight. He is a very complete performance package. A standout calf from the start which we retained for stud use. The combination of calving ease, low birth, large scrotal & carcass quality has made him a very easy bull to use. He adds value to every mating you use him on!

Hooper, dare I say it, is a fantastic son of TeMania Africa! Unprecedented birth to final, outstanding milk in the top 1% for the breed, extraordinary scrotal also in the top 1%, along with a Heavy Grass Index in the top 2%. EMA is in the top 3%. This bull is as thick as a brick, and sound as a bell and is the best Africa son I have ever seen. His temperament is perfect & he is breeding very well.

A semen share was purchased by Weeran in this yearling bull at the record breaking 2015 Millah Murrah sale. The TeMania Emperor sons I believe are very impressive, and I felt this yearling bull displayed the Millah Murrah type with enough petrol in the tank, to use in a performance orientated program. His progeny are great types thick, deep sided, broad based cattle that catch your eye.

The first of the Herdbook Coolana bred cattle, purchased at their 2017 Dispersal Sale. We purchased 46 females, introducing Coolana HBR genetics to increase our Herdbook numbers and deliver genetic diversity. A very good earlier maturing calf with outstanding mature cow weight of only +79. The Upward cattle are deep sided cattle with plenty of guts! We purchased an Upward daughter from the Wattletop Angus Dispersal Sale to develop these desirable traits. Good gutsy cattle!!
