# WELCOME TO WEERAN ANGUS

Dear Cattle Breeders,

While writing this introduction, a lot of Australia is in lock down. We trust you and your family are safe and well in this new Covid-19 world we are all living in.

It is with great pleasure we present our Spring On Property sale catalogue for 2021. On behalf of the Moore Family and the Weeran Angus Team, we would like to welcome you to our 15th spring sale and our 46th Annual on property Bull Sale. This year we are offering 64 performance bulls for sale, with 44 two year old Spring drop bulls and 22 rising eighteen month old Autumn drop bulls.

All bulls have their latest Genomic data which guarantees pedigree accuracy and fine tuning each animal to it's true genetic potential. Every bull is Sire Verified!

This sale features 13 outstanding lots by Weeran Hooper, 9 by proven performer Weeran Joel, 6 Lawsons Momentous sons who are a standout in our program for EMA and IMF. 5 sons of Baldrige Compass, who has calving ease and carcass, with positive fat. Sydgen Enhance continues his presence in our program with calving ease and good growth and carcass. A Sydgen Black Pearl son, Weeran No Problem N80, also has a number of sons who have fabulous temperament.

We have used several of our top sale bulls in the Weeran herd covering approx 2/3 of our heifer

joining, and they will now be offered in this sale. True testament in the belief we have in these bulls, and they look outstanding. Calving ease, growth, carcass, phenotype and temperament! Their calves will be landing any minute! It will be very exciting to see their progeny already coming through the program!

Our bull sale will be held on property and online with Elite Livestock Auctions. This has worked very well for the last two sales, and definitely the start of a new era of selling at Weeran. We look forward to continuing the on line presence with Elite.

We have a very passionate team at Weeran Angus who we could not achieve what we do without them. Young and enthusiastic with great energy, and they have a great eye for breeding top cattle. They have passion for agriculture, for breeding top performance cattle, and work so well as a team! Thank you Tom, Leah, Bryce and Hamish! Thanks also to Lucy Moore who runs the social media side with Jo.

The Weeran Team looks forward to welcoming you to the Bull Inspection Day on Tuesday 31st August at 10am, and Bull Sale on Tuesday 7th September at 1pm.

Thank you to the many clients and friends who support the Weeran program. It is very much appreciated.

Kind regards  
Alec & Jo Moore

## HEIFER BULL SELECTION CRITERIA

Heifer bull recommendations are the combination of Calving Ease EBV's, Birthweight EBV, pedigree history and actual birthweight, which gives me confidence to recommend them for heifer matings!

It is not an exact science, but a recommendation!

## DELIVERY

Weeran will organise delivery of your purchases free of charge up to 150kms. Over and above this by negotiation.

**ALL SALE BULLS COMPREHENSIVELY GENOMICALLY TESTED**

# HEALTH STATUS FOR ALL SALE BULLS

1. Semen Quality Tested

2. Drenched and 7 in 1 Vaccination

3. One Pestigard Vaccination and One Vibrovax Vaccination to all Sale Bulls

## SEMEN RIGHTS

Weeran retains semen rights on all sale bulls for use in Weeran herd. If required, Weeran will organise and collect semen at our expense and at your convenience.

## GENETIC CONDITIONS

All sale bulls have been tested for known genetic conditions, and results are printed in the catalogue. For further information, please refer to Angus Australia website...

[www.angusaustralia.com.au](http://www.angusaustralia.com.au)

## COMPREHENSIVE GUARANTEE & SUPPLEMENTARY CATALOGUE INFORMATION

IF YOU EXPERIENCE ANY PROBLEMS, PLEASE MAKE SURE WE ARE THE FIRST CONTACT TO ENSURE WE CAN HELP YOU!

Visit [www.weeranangus.com.au](http://www.weeranangus.com.au) for full details

## IBMS GTS GRADING

### IBMS GENETIC TYPE SUMMARY (GTS)

All Weeran bulls have been assessed on the GTS Type/Structure system. All the bulls in the catalogue are considered acceptable for soundness and muscling. The GTS system has been broken up into two distinctive trait groups.

### DESCRIPTIVE TRAITS

**Stature** - Evaluation of bulls for frame size. A maturity pattern 25 is an average frame bull. This may be influenced by age of dam, particularly first calf heifers.

**Capacity** - Bull evaluation combines depth of fore rib along with spring of rib and width of chest floor, as well as depth of flank. Scores greater than 25 indicate larger capacity.

**Body Length** - Evaluation of body length from withers to pins. Scores greater than 25 indicate longer body length. Muscle - Scores higher than 25 indicate above average muscle.

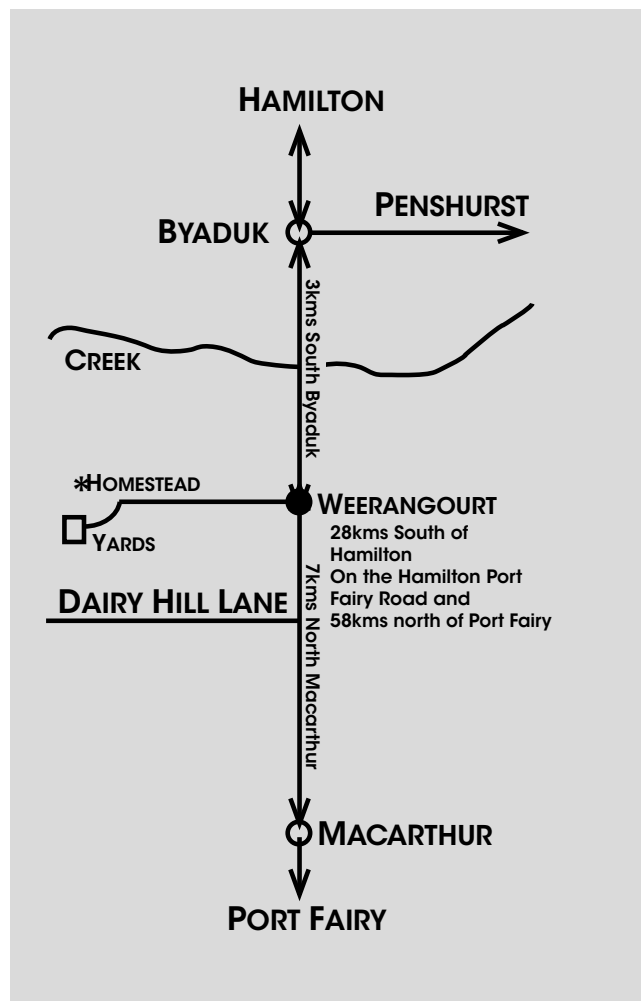

**Doing Ability** - Ability to lay fat relative to their peers under common management system.

### STRUCTURAL SOUNDNESS TRAITS

The system is aimed at being as simple as possible. All structural traits (front and rear feet, rear leg angle and pastern scores) are presented in the same format. A score of 5 is optimum. Scores of 4 or 6 represent a slight variation from ideal.

These animals would be acceptable in most breeding programs. Scores of 3 and 7 have a larger variation from ideal, but would be acceptable in most commercial herds, but seedstock producers should assess these animals carefully. Scores of 2 or 8 are low scoring and should be carefully evaluated prior to purchasing.

Bulls scoring outside these scores should be considered culls and not catalogued for sale. Structure scoring is only given to give potential purchasers a guide, it is not a guarantee of the lifetime structure soundness of an animal. Many thanks to Dick Whale for assessing all sale bulls. WEERAN GUARANTEES!

Hooper is a fantastic son of TeMania Africa! Unprecedented birth to final, extraordinary scrotal also in the top 1%. This bull is as thick as a brick, and sound as a bell and is the best Africa son I have ever seen. His temperament is perfect & he has bred so well at Weeran along with many herds who have purchased his genetics. Twelve sons sold for an average of \$6,917 at the 2019 Spring sale with three equal topping the sale. He has 390 progeny on the ground.

WEERAN Z50

Joel has been a star performer at Weeran! He is the full package for performance which was validated with his outstanding final results in the Angus Society benchmarking trial, Cohort 6. With a group of 41 sires registered, Joel was in the leading pack of all traits recorded. No 1 in the cohort for Carcase Weight, 4th for 600 day weight and ABI, 6th for 200 day weight and 8th for EMA. A very exciting home bred sire. The combination of calving ease, low birth, large scrotal and carcase quality has made him a very easy bull to use. Joel was the leading reference sire in the Spring 2020 bull sale with five sons selling to a top of \$14,000 and an average of \$10,700. We have a lot of faith in his females in our herd. He has 414 progeny analysed across 10 herds.

Exclusive is a calving ease LD Capitalist 316 son, whose progeny are phenotypically showing a lot of promise. He has more frame and extension upfront than his sire. Exclusive has great capacity, excellent mobility behind, great muscle expression and doing ability. He is a high growth bull with above breed calving ease and is Capitalist's highest carcase merit son. Musgrave Angus sold the bull in 2016 and purchased him back to use as a mating sire in 2018.

## SYDGEN ENHANCE

# HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

-  1 Simply go to [www.elitelivestockauctions.com.au](http://www.elitelivestockauctions.com.au) using your desktop, laptop, iPad, iPhone or android device
-  2 Click on the "Sign Up" page / link
-  3 Create a bidding profile using the bidder registration page.  
*(You can either register as a livestock agent, company or private buyer.)*
-  4 Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
-  5 Click "Register"
-  6 You will then be notified by email that an account has been created

-  7 Once an account has been created you are all "Set to Bid"
-  8 Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
-  9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
-  10 The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
-  11 On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.  
*(There is no need for software download)*
-  12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Having trouble registering and logging in?  
Contact Elite Livestock Auctions

# 2021 AUTUMN BULL SALE PHOTOS

## 1. UPON ARRIVAL:

- a) Ensure your new bulls socialise with a group of animals, (anything except other bulls) in the yards, when they arrive.
- b) Run the new bulls with a small group of empty females, (he has come from a different herd and may not have had exposure to some of the normal pathogens present in your herd – see further information below).
  - i. **This MUST be done with the empty females, for a period of 2 to 4 weeks.** Ideally the bull can then be rested for 6-8 weeks prior to joining.
  - ii. **Ideally give the cows prostaglandin every 2 weeks so they continue to cycle.**
- c) Ideally bulls should be insured for their first year as standard.

## 2. PRE-JOINING:

- a) We recommend a breeding soundness examination (BSE), including structural assessment, testicular palpation, service ability testing and semen testing (essential in single sire matings). This is mandatory for second joining and older bulls each year. It will improve the fertility performance of the herd, by removing infertile bulls from the joining group. If bulls are not service tested it is essential that you observe the bulls serve in the first week of joining.
  - i. These bulls will be given a risk rating and mating potential which will influence joining bull teams.
- b) **Keep vaccinations up to date;** Vibrovax, Leptospirosis 7-in-1, Pestigard and an annual drench, 4-6 weeks prior to joining.

## 3. JOINING - new bulls have the highest risk of breakdown in the herd, this risk can be reduced by:

- a) **PROTECT a new bull by not over-joining, 30 females per virgin bull maximum.**
- b) **Recommended to multi-sire join.**
  - i. Ideally mixing bulls of different age groups, experience levels and risk ratings.
- c) **It is recommended, IF single sire joining with a new bull, to rotate him with a proven bull for at least one cycle. Also, it is good practice to rotate proven bulls for the last cycle with all new bulls.**

**“Most new bull fertility issues develop or are acquired during the joining period, rather than being pre-existing problems, this means that bull observation during the joining period is essential!**

**ONCE THE JOINING PROGRAM IS SET UP, MONITORING IS ESSENTIAL TO IDENTIFY ISSUES AS THEY DEVELOP.**

Your new bulls need to be run in mobs that are easily monitored, keep them close to promote observation, check them 2 to 3 times a week for the first three weeks and then weekly thereafter. This involves looking for,

1. The bull serving, (this has not been successful until the bull thrusts). If bulls are continually mounting without serving it is often a sign the bull has developed a penile infection and needs to be rested and replaced immediately. Sound bulls should serve every 1 to 2 mounts.
2. Lameness.
3. Evidence of penile or preputial swelling or inflammation.
4. Signs of ill health, lethargy, etc.
5. Estimate the number of females cycling, (for every 20 females, one cycles each day at the commencement of joining). After three weeks of joining, there should only be one cow cycling every three days in 20 females.

#### 4. POST-JOINING:

- a. **Annual breeding soundness evaluation is a non-negotiable procedure.**
  - b. Good management of bulls is a year-round procedure.
    - i. Keep bulls in working body condition – they should be in body condition score 3/5 at the start of mating, which will involve removing weight following the joining period.
    - ii. Manage bulls in groups of joining teams to establish stable social hierarchies and minimise bull fighting.
- ✓ Bulls need to be removed from the cows at the same time, to help create their bull mobs. This will limit the number of potential injuries by reducing the number of bull interactions.
  - ✓ Bull paddock management is very important to minimise injury between joinings. The bulls need enough room to reduce fighting, restricted feed and water will increase interaction. Paddocks will require co-grazing with sheep, or crash-grazing by other mobs to manage feed quality and quantity on offer for the bulls.
  - ✓ The target between joining is to restrict weight gain in older bulls to prevent breakdowns. Ideally young bulls have access to a higher level of nutrition as they continue to grow.
  - ✓ Early pregnancy testing is essential for good female management and detection of failures. The earlier the pregnancy testing is undertaken, the more likely the cause of the problem will be identified. This will not only give you early notice of the problem but also help in formulating a plan to help reduce the chance of the problem occurring again in the future.

#### **PENILE INFECTIONS IN BULLS – “Balanoposthitis”:**

Penile infections are a common disease in young bulls during their first joining season in any new herd. Mitigating the risk of this disease as outlined above is essential to reduce the number of breakdowns and optimise bull cost per calf.

These infections are caused by a range of bacterial, viral, and other organisms (“pathogens”). The genital form of infectious bovine rhinotracheitis (IBR; herpes virus) is commonly implicated. The issue is that any given property has its own population of reproductive tract pathogens and if the new bulls make their first contact with these pathogens at the time of high workload (such as joining) they are at a high risk of developing a penile injury.

These injuries typically involve a reddened inflamed penis, developing to ulceration and pustules. Some bulls will stop serving due to pain (will continue to mount, but not serve), but other high libido bulls will continue to serve and create significant inflammation commonly leading to preputial tears, abscesses and prolapses. These are often perceived to be a “broken penis”, and **IF treated promptly may regain normal function!**

Treatment involves prompt removal of the affected bull from the joining mob, sexual rest (typically for the remainder of the joining) and treatment with antibiotics and anti-inflammatories. Preputial prolapses require surgical reduction.

If undetected these injuries commonly cause a significant decrease in pregnancy rate and commonly result in permanent infertility in the bull. **Observation and intervention are essential!**

Prevention of this condition is best achieved as outlined above, by deliberate pre-exposure of new bulls to a small number of females (low workload) well before the joining so that they are exposed and can develop immunity to the herds’ pathogens prior to the high workload of the joining period.

Positive fertility outcomes are a significant driver of profitability in beef breeding enterprises, but this requires informed and active management!

HVC Production & Breeding.

What a way to start this Spring Sale! Hooper and Joel combinations have so many runs on the board and are tried and proven over and over again, and this is no exception. An outstanding young sire who has been used in the Weeran heifer joining program with calves arriving as we type. Dam L302 by Weeran Joel has made her stamp on the herd, and produced 4 male calves and is still going strong! Q385 has very good indexing and growth, excellent fertility and top IMF at 3.2. He's an impressive package!

An absolute standout Weeran Joel son used in the Weeran joining over heifers. Joel has put his stamp on the Weeran herd with many females performing so well over a long time. Outstanding indexing, great calving ease, excellent growth, early to calve, with excellent fertility. Phenotypically a magnificent bull with great capacity. Such a great all rounder!

A magnificent Joel/Dinky Di son used in the Weeran Herd over the heifers, with fantastic calving ease with direct and daughters both in the top 3% for the breed, and excellent indexing, along with an awesome EMA in the top 2% for the breed at 12.3, being the third top EMA in this catalogue!! A classic Joel son exhibiting the athletic qualities of Joel with great phenotype.

A son of Wattletop Franklin K252 out of a Hector daughter, and selected to be used in the Weeran program. Calves are hitting the ground by Q196 as we type! There is no better proof than Weeran using a bull in our own breeding program! Excellent indexing, growth, calving ease, scrotal and structure!! Graded 6 for structure by Dick Whale. What a package this bull is! Very impressive!

Explosive early growth in this Momentous/Musgrave Big Sky combination, along with an excellent maternal trait with milk in the top 4% for the breed, positive fat and top IMF of 3.2. Mature Cow Weight perfect for cost of production rationale, being the same as 400 day weight. Dam M416 has produced three outstanding male progeny. Very good structure ebv's. Long bodied bull that stands over a lot of ground. The Momentous cattle have also displayed exceptional docility. Used in the Weeran program over heifers.

A very impressive Sydgen Enhance son out of a Weeran Joel daughter, topping the ebv chart in so many areas. Top 4% for all growth ebv's, top 7% for all indexes, very good calving ease across all traits, excellent EMA in top 3% and very good net feed efficiency. Excellent grading of 6 by Dick Whale. A complete package used in the Weeran heifer joining program which is a testament to what we think of Q184. Calves will be hitting the ground by him any day!

We are excited to be offering the first of the R drop young eighteen month old bulls at this sale. The first on offer is a Herdbook embryo son by Baldridge Beast Mode out of Witherswood Lowan K0116. K0116 is a super sound daughter of EF Complement 8088, who we have flushed a number of times very successfully. She is a good old fashioned, broad muzzled, wide pinned, deep bodied cow with excellent feet and temperament! An outstanding cow! There is a lot of hype around about Beast Mode, and this young gun is a ripper! Awesome growth in the top 1, 2 and 3%, combined with a Mature Cow Weight of 116 which is lower than its 400 day weight, which is ideal for production of highly efficient breeding females. Structure EBV'S are excellent and longevity from K0116, should make him a good long term investment.

Wattletop Barunah M157, a Tehama Upward daughter we purchased at the Wattletop Dispersal sale, has flushed very well for us, and has bred well. Last years natural calf sold for \$10,000 in the autumn sale and was graded 7 for structure. This cow breeds well. A Herdbook Sydgen Enhance son with good fertility with scrotal in the top 8% and very feed efficient.

Holy rock and roll, look at this fantastic growth curve. Birthweight of 0.6 to 600 day weight of 122! That's a bender and as good as it gets! Excellent calving ease and ideal for your heifer joining. The well respected Wattletop genetics are across both sides of the pedigree tree! Top 1% for net feed efficiency and top 6% milk. An excellent maternal package. Herdbook registered.

When you look back over the history of this dam, VHW342, a TC Franklin daughter, you love to see the quality of calves she has produced. 6 male calves have all been sold into herds and breeding on, with another male calf coming up through the ranks. What a great testament! Calving ease with daughters and direct, and early calves hitting the ground, with good IMF and negative fat.
